

When Emergency strikes use InCaseIT™

InCaseIT gives you full control over the incident and helps you get the job done

InCaseIT ensures correct alerts and provides you with your dynamic checklists. The system provides mobile readiness – anywhere and anytime – within seconds. With just a few keystrokes you have alerted your emergency response team and are handling the incident – simultaneously. Everyone knows what to do and what others are doing – coordinated. InCaseIT contains all the necessary tools you need when handling the incident – you are organized.

InCaseIT Pro – your personal toolbox for efficient crisis management

One click - and your checklists, documents and schematics are in your hand – no matter where you are. It has never been easier to scramble your team, participate in a conference call and contribute during

an incident – command, control and communicate. InCaseIT Pro is the answer to the challenges in our modern society where time is short, complexity and risks are increasing and nothing is static. Unfortunately incidents still happen.

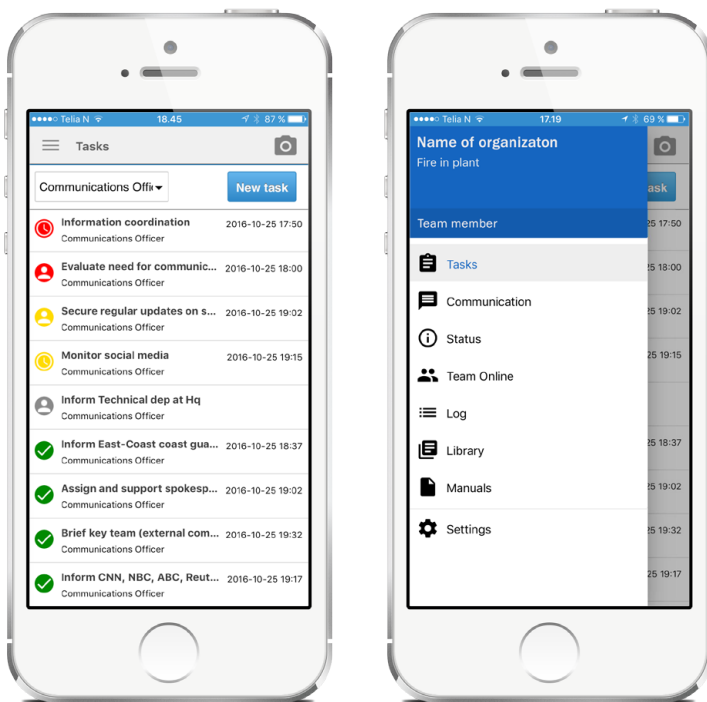

InCaseIT Pro includes:

- Group alert via voice, SMS and email
- Overview over participants
- Dynamic checklists
- Recurring task
- Information sharing
- Pictures of the situation
- In APP documents and drawings
- Conference calls

Get started with InCaseIT™ Pro

It's easy to get started with the InCaseIT app. When downloading InCaseIT Pro, you get immediate access to your emergency preparedness plan. InCaseIT helps you scramble personnel, get an overview of your tasks, manage messages, start conference calls, take pictures and see the log. All you need for a good crisis management.

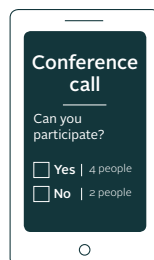

Get to know the menu:

- **Tasks:** you automatically get your assigned tasks
- **Communication:** sending voice, SMS and e-mail messages and starting conference calls
- **Status:** the current situation
- **Team Online:** members that are active
- **Log:** activities are logged and saved
- **Library:** photos from the incident
- **Manuals:** templates, drawings, maps etc.
- **Settings:** change incident and language

INTUITIVE SETTINGS

InCaseIT supports personal configuration set-up and settings, such as language. Choose from +10 languages for your personal profile.

EASY CONNECTIONS

Synchronise your team within seconds! "Conference call" is your fastest way to get coordinated. Just write the names of the attendees and click "Go". No pin-codes – just conference!
